Professional Summary

Computer Engineering student with hands-on experience in backend development, artificial intelligence, and machine learning. Proficient in designing scalable backend systems using Python, Django, Django REST Framework, PostgreSQL, Redis, and Docker. Experienced in developing and deploying AI-powered applications, including Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Computer Vision, and AI Agent systems. Passionate about building production-ready software that combines robust backend engineering with modern AI technologies.

Education

B.Sc. in Computer Engineering,

Iran University of Science and Technology ✉

09/2022 – present

Tehran, Iran

Relevant Coursework:

- Data Structures (Grade: 19.05/20)
- Artificial Intelligence (Grade: 17.65/20)
- Computer vision (Grade: 17.75/20)
- Natural Language Processing (Grade: 20/20)
- Advanced Software engineer (Grade: 19.2/20)

Skills

Python • OpenCV • Matplotlib • Numpy • Pandas • Scikit-learn • keras • Pytorch •
Langchain / langGraph • Django • REST(DRF) • Docker • Git • Redis • PostgreSQL •
Web Scraping • RAG • LLM • Laravel • Go

Interests

- Backend Engineering and Distributed Systems
- Artificial Intelligence and Machine Learning
- Deep Learning, Computer Vision, and Natural Language Processing
- Large Language Models (LLMs) and AI Agent Systems
- Scalable Software Architecture and Cloud Deployment

Professional Experience

Backend Developer - AI-Powered, *painfools studio*

07/2025 – 10/2025

- Developed backend services and RESTful APIs for a multiplayer game using Django and Django REST Framework.
- Designed scalable game logic, player interaction systems, and backend data management.

Tehran, Iran

- Built AI-powered image processing pipelines using ControlNet for image enhancement and product-matching applications.
- Integrated AI models with backend services through modular and scalable APIs.
- Participated in system architecture design to improve maintainability and performance.

Ai developer, Comfyuse

07/2025 – 02/2026

Tehran,Iran

- Designed and developed scalable backend systems and RESTful APIs using Python, Django, Django REST Framework, PostgreSQL, and Redis.
- Built and deployed containerized applications with Docker while maintaining CI/CD pipelines for automated testing and deployment.
- Developed AI-powered features using LangChain, LangGraph, and modern LLMs, including agent-based workflows and Retrieval-Augmented Generation (RAG) pipelines.
- Optimized deployment infrastructure across VPS and RunPod environments, improving reliability, scalability, and operational efficiency.
- Collaborated with cross-functional teams to integrate AI services into production-ready backend architectures.

Projects

AI-Powered Classroom Analytics System (University Course Project)

05/2025 – 09/2025

- Built a real-time Computer Vision system for classroom attendance and engagement analysis.
- Used RetinaFace, YOLO, ByteTrack, MediaPipe, and FER-2013 for face detection, tracking, gaze estimation, and emotion recognition.
- Developed a dashboard to visualize attendance, attention, and classroom behavior insights.

Agent-Builder DSL (Domain-Specific Language)

11/2025 – 01/2026

- Designed a custom DSL for orchestrating AI agents powered by Google Gemini.
- Built an interpreter that translates DSL syntax into multi-agent workflows.
- Integrated Google GenAI Function Calling and Tool Use for autonomous reasoning and execution.
- Created a modular framework for agent collaboration, state management, and context persistence.
- Simplified the development of complex AI agent systems through declarative workflow definitions.

SchemaMind

06/2026 – 07/2026

- Developed an AI-powered platform for generating, editing, and validating JSON Schemas using Large Language Models (LLMs).
- Designed an interactive interface for schema visualization, editing, and automated validation.
- Implemented intelligent schema generation and refinement workflows to accelerate API and data model development.
- Built a modular architecture supporting efficient schema management and extensibility.
